Specific entry requirements

Course for exchange students within established agreements between the Physiotherapy Programme at Karolinska Institutet and partner universities abroad. The ECTS grading scale will be applied. General eligibility requirements for university studies, and previous clinical placement equivalent to 7.5 ECTS (or 5 weeks). In addition, specific eligibility requirements are as follows: a very good command of English or a very good command of Swedish at least 2 years of study at a study programme in Physiotherapy basic computer knowledge

Objectives

After the course, the student will have an improved knowledge and comprehension of physiotherapy theory, professional skills and professional attitude.

Content

Clinical rotation at out-patient clinics or hospitals within one or more of the area specified by the
Teaching methods

The student will engage in clinical work/activities. The student shall take part in treatment of patients, lectures, laboratory experiments and group tasks and continuously discuss the physiotherapy process with an experienced licensed physiotherapist/clinical educators. The student is expected to take an active part in the work in the clinic. In addition, when arriving at the clinic, the student gets a detailed personal schedule for attendance and also a contact person/clinical educator. The schedule can be changed according to the students interest but the contact persons at the involved clinics must always confirm any changes in the schedule. The student will engage in clinical work/activities under the supervision of experienced licensed physiotherapists/clinical educators.

Examination

The student is expected to complete learning agreement/assignments agreed upon at the start of the clinical rotation. Written evaluation will be carried out throughout the rotation according to knowledge and comprehension of physiotherapy at the clinic. The written evaluation should also reflect on similarity and differences in relation to the students home country. Any absence/deviation from learning agreement must be reported to the contact person and also to the responsible teacher. The responsible teacher also makes a decision about how to make up for the absence/missed task after completing the ordinary schedule. The ECTS grading scale (A–F, 7-grades) will be applied.

Transitional provisions

Examination will be provided during a year after a possible closure of the course alternatively at a new course curriculum.

Other directives

Evaluation The course will be evaluated in accordance with the guidelines established by the Board of Education (Styrelsen för utbildning), Karolinska Institutet. In addition, students are expected to write a written report, which will be open to responsible coordinator at the students home university as well as responsible teacher and clinical educator. Student is also expected to take an active part during formative evaluation during the running course.
