Specific entry requirements

For admission to the course, it is required that the student is admitted to the Study Programme in Nursing with general entry requirements for higher education in accordance with the Higher Education Ordinance, Chapter 7 (Swedish Statute Book 1998:1003). Furthermore, a total of 60 HE credits from semesters 1 and 2 should be approved, and, at least, 15 HE credits from semester 3.

Objectives

The aims of the course The aim of the course is that the student should deepen his knowledge in the nursing subject, and in scientific theory and method Learning outcomes On completion of the course, the student should be able to - analyse concepts and theories within nursing - integrate nursing from an ethical, theoretical and action perspective - relate science theory to knowledge in nursing - analyse design and method for a delimited subject area within nursing before a future degree project - reflect on
the use of theory and its importance for research within nursing - reflect on research and researcher ethics

Content

Contents Part 1 Ontology and epistemology of nursing, 3 HE credits Ontology and epistemology of nursing, 3 ECTS Advanced knowledge within the ontology and epistemology of the nursing care with a focus on ethics, theory and practice Part 2 Scientific theory and method, 4.5 HE credits Scientific theory and method, 4.5 ECTS Science theory, research design, research methods, research ethics

Ontology and epistemology of nursing, 3.0 hp
Grading scale : VU

Scientific theory and method, 4.5 hp
Grading scale : VU

Teaching methods

Working forms Selfstudy, lectures, workshop, seminars, supervision seminars. The modified distance education is IT-based and characterised by independent and collaborative learning. Various working methods, such as individual study assignments, work in groups, lectures, discussions and seminars, both virtually and at physical meetings, are used. The number of physical meetings is limited to at most 1 day/1.5 credits.

Examination

Examination Part 1: Individual written examination Part 2: Individual written examination (project plan, written individually or in pairs) and defence of one's own work and examination of another work Some lectures, seminars and supervision seminars are compulsory elements of the parts and require attendance for a Pass grade in the course. Compensation for any absence is made in consultation with the course coordinator. The grading system for each part is Fail/Pass/Pass with distinction. For a Pass with distinction in the whole course, a Pass with distinction is required in the larger part (project plan). Limitation of the number of examinations At KI, a student is entitled to a total of 6 examinations in each part to achieve a pass grade A student without an approved result after 3 completed examinations is entitled to retake the course (part) once more. However, there are at most 6 examination opportunities (see Local guidelines for the undergraduate programme). Time for examinations is announced at the beginning of the course.

Transitional provisions

Regulations at transitions (Temporary regulations) For a course that has been closed down or undergone major changes, or where the reading list has been changed considerably, three additional tests (excluding regular tests) in the previous literature and the earlier contents should be given during a period of a year from the date of the change (see Local guidelines)
